1. Identification

Product identifier used on the label

Pigment Red 254

Recommended use of the chemical and restriction on use
Recommended use*: colouring component
Unsuitable for use: This material is not intended for use in products for which prolonged contact with mucous membranes, body fluids or abraded skin, or implantation within the human body, is specifically intended, unless the finished product has been tested in accordance with nationally and internationally applicable safety testing requirements. Because of the wide range of such potential uses, we are not able to recommend this material as safe and effective for such uses and assume no liability for such uses.

Details of the supplier of the safety data sheet
Dongguan Baoxu Chemical Technology.,ltd.
Caijin Business Bldg DongGuan CN 523071
+86 0769 22821082 Fax 86 0769 22821083

info@additivesforpolymer.com

Other means of identification
Chemical family: organic pigment

2. Hazards Identification

Combustible Dust          Combustible Dust (1) Combustible Dust

Label elementsM
Signal Word:
Warning

Hazard Statement:
May form combustible dust concentration in air.

Hazards not otherwise classified
The product is under certain conditions capable of dust explosion.

3. Composition / Information on Ingredients

This product does not contain any components classified as hazardous under the referenced regulation.

4. First-Aid Measures

Description of first aid measures

General advice:
Remove contaminated clothing.

If inhaled:
If difficulties occur after dust has been inhaled, remove to fresh air and seek medical attention.

If on skin:
Remove contaminated clothing. Wash thoroughly with soap and water. If irritation develops, seek medical attention.

If in eyes:
Wash affected eyes for at least 15 minutes under running water with eyelids held open. If irritation develops, seek medical attention.

Most important symptoms and effects, both acute and delayed

Symptoms: The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11.

Indication of any immediate medical attention and special treatment needed

Note to physician
Treatment: Treat according to symptoms (decontamination, vital functions), no known specific antidote.
Fire-Fighting Measures

Extinguishing media
Suitable extinguishing media:
dry powder, foam

Unsuitable extinguishing media for safety reasons:
carbon dioxide

Additional information:
Avoid whirling up the material/product because of the danger of dust explosion.

Special hazards arising from the substance or mixture
Hazards during fire-fighting:
harmful vapours
Evolution of fumes/fog. The substances/groups of substances mentioned can be released in case of fire.

Advice for fire-fighters
Protective equipment for fire-fighting:
Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

Further information:
Dusty conditions may ignite explosively in the presence of an ignition source causing flash fire.

5. Accidental release measures Personal precautions, protective equipment and emergency procedures
Avoid dust formation. Use personal protective clothing.

Environmental precautions
Contain contaminated water/firefighting water. Do not discharge into drains/surface waters/groundwater.

Methods and material for containment and cleaning up
For small amounts: Pick up with suitable appliance and dispose of.
For large amounts: Contain with dust binding material and dispose of.
Avoid raising dust.

6. Handling and Storage Precautions for safe handling
Breathing must be protected when large quantities are decanted without local exhaust ventilation. Closed containers should only be opened in well-ventilated areas.
Protection against fire and explosion:
Avoid dust formation. Take precautionary measures against static discharges.

Dust can form an explosive mixture with air.

Conditions for safe storage, including any incompatibilities
Further information on storage conditions: Keep container tightly closed and dry; store in a cool place.
Avoid all sources of ignition: heat, sparks, open flame.

7. Exposure Controls/Personal Protection

No occupational exposure limits known.

**Personal protective equipment Respiratory protection:**
Wear a NIOSH-certified (or equivalent) particulate respirator.

**Hand protection:**
Chemical resistant protective gloves

**Eye protection:**
Safety glasses with side-shields. Wear face shield if splashing hazard exists.

**General safety and hygiene measures:**
Handle in accordance with good industrial hygiene and safety practice. Due to the colouring properties of the product closed work clothes should be used, to avoid stains during manipulation. Eye wash fountains and safety showers must be easily accessible.

### Physical and Chemical Properties

- **Form:** powder
- **Odour:** characteristic
- **Odour threshold:** No applicable information
- **Colour:** available. red
- **pH value:** 5.5 - 8.5 (as suspension)
- **Melting point:** > 300 °C
- **Boiling point:** (1.013.25 hPa) not applicable, solid with a melting temperature over 300 °C not relevant not highly flammable
- **Flash point:** not applicable
- **Flammability:** For solids not relevant for classification and labelling.
- **Lower explosion limit:**
- **Upper explosion limit:**
- **Autoignition:** For solids not relevant for classification and labelling.
- **Vapour pressure:** > 600 °C not applicable, solid with a melting temperature over 300 °C
- **Density:**
- **Relative density:**
### 10. Stability and Reactivity

#### Reactivity

No hazardous reactions if stored and handled as prescribed/indicated.

- **Corrosion to metals:**
  No corrosive effect on metal.

- **Oxidizing properties:**
  not fire-propagating (Directive 84/449/EEC, A.17)

- **Formation of flammable gases:**
  Remarks: Forms no flammable gases in the presence of water.

#### Chemical stability

The product is stable if stored and handled as prescribed/indicated.

#### Possibility of hazardous reactions

Dust explosion hazard.

#### Conditions to avoid

Avoid dust formation. Avoid deposition of dust. Avoid all sources of ignition: heat, sparks, open flame. Avoid electro-static charge.

#### Incompatible materials

strong oxidizing agents, strong bases, strong acids

#### Hazardous decomposition products

Decomposition products:

  If necessary, information on other physical and chemical parameters is indicated in this section.
11. Toxicological information

Primary routes of exposure

Routes of entry for solids and liquids are ingestion and inhalation, but may include eye or skin contact. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquefied gases.

Acute Toxicity/Effects

Acute toxicity
Assessment of acute toxicity: Virtually nontoxic after a single ingestion. Virtually nontoxic after a single skin contact. Virtually nontoxic by inhalation.

Oral
Type of value: LD50 Species: rat (male/female)
Value: > 5,000 mg/kg (Directive 84/449/EEC, B.1)

Inhalation
Type of value: LC0
Species: rat (male/female)
Value: > 2.25 mg/l (OECD Guideline 403)
Exposure time: 4 h

Dermal
Type of value: LD50 Species: rat (male/female)
Value: > 2,000 mg/kg (OECD Guideline 402)

Assessment other acute effects
Assessment of STOT single:
Based on the available information there is no specific target organ toxicity to be expected after a single exposure.

Irritation / corrosion
Assessment of irritating effects: Not irritating to the skin. Not irritating to the eyes.

Skin
Species: rabbit
Result: non-irritant
Method: Directive 84/449/EEC, B.4

Eye
Species: rabbit
Result: non-irritant
Method: Directive 84/449/EEC, B.5

Sensitization
Assessment of sensitization: Skin sensitizing effects were not observed in animal studies.

Guinea pig maximization test
Species: guinea pig
Result: Non-sensitizing.
Aspiration Hazard
not applicable

**Chronic Toxicity/Effects**

Repeated dose toxicity
Assessment of repeated dose toxicity: Repeated oral uptake of the substance did not cause substance-related effects.

Genetic toxicity
Assessment of mutagenicity: The substance was not mutagenic in bacteria. The substance was not mutagenic in studies with mammals. No mutagenic effects reported.

**Carcinogenicity**

Assessment of carcinogenicity: The whole of the information assessable provides no indication of a carcinogenic effect.

Reproductive toxicity
Assessment of reproduction toxicity: Based on the ingredients, there is no suspicion of a toxic effect on reproduction.

**Teratogenicity**

Assessment of teratogenicity: No indications of a developmental toxic / teratogenic effect were seen in animal studies. Literature data. No teratogenic effects reported.

**Symptoms of Exposure**

The most important known symptoms and effects are described in the labelling (see section 2) and/or in section 11.

**12. Ecological Information**

**Toxicity**

Aquatic toxicity
Assessment of aquatic toxicity:
There is a high probability that the product is not acutely harmful to aquatic organisms. The inhibition of the degradation activity of activated sludge is not anticipated when introduced to biological treatment plants in appropriate low concentrations.

**Toxicity to fish**
LC50 (96 h) > 100 mg/l, Brachydanio rerio (OECD 203; ISO 7346; 84/449/EEC, C.1, static)
Nominal concentration. No toxic effects occur within the range of solubility. Limit concentration test only (LIMIT test).

Aquatic invertebrates
EC50 (24 h) > 100 mg/l, Daphnia magna (OECD Guideline 202, part 1, static)
Nominal concentration. No toxic effects occur within the range of solubility.

Aquatic plants
EC50 (72 h) > 100 mg/l (growth rate), Desmodesmus subspicatus (OECD Guideline 201, static)
Chronic toxicity to fish
No observed effect concentration (21 d), Oncorhynchus mykiss (OECD Guideline 204, Flow through.)
Nominal concentration. No toxic effects occur within the range of solubility. No effects at the highest test concentration. The product has low solubility in the test medium. A saturated solution has been tested.

Chronic toxicity to aquatic invertebrates
No observed effect concentration (21 d), Daphnia magna (OECD Guideline 202, part 2, semistatic) Nominal concentration. No toxic effects occur within the range of solubility. No effects at the highest test concentration. The product has low solubility in the test medium. A saturated solution has been tested.

Soil living organisms
Toxicity to soil dwelling organisms:
LC50 (14 d) > 1,000 mg/kg, Eisenia fetida (artificial soil)
Toxicity to terrestrial plants
EC0 (15 d) > 1,000 mg/kg, Lolium perenne (OECD Guideline 208)

Microorganisms/Effect on activated sludge
Toxicity to microorganisms
Activated sludge, domestic/EC20 (3 h): > 100 mg/l
Nominal concentration. No toxic effects occur within the range of solubility.

Persistence and degradability
Assessment biodegradation and elimination (H2O)
Not readily biodegradable (by OECD criteria). Poorly biodegradable. Poorly eliminated from water. Elimination information
4 % CO2 formation relative to the theoretical value (28 d) (OECD 301B; ISO 9439; 92/69/EEC, C.4 - C) (aerobic, activated sludge, domestic, non-adapted)

Information on Stability in Water (Hydrolysis)
Study technically not feasible.

Bioaccumulative potential
Bioaccumulation potential
No significant accumulation in organisms is expected as a result of the distribution coefficient of n-octanol/water (log Pow).

Mobility in soil
Assessment transport between environmental compartments
The substance will not evaporate into the atmosphere from the water surface. Adsorption to solid soil phase is expected.

Additional information
Adsorbable organically-bound halogen (AOX): approx. 20 %
Other ecotoxicological advice:
Do not discharge product into the environment without control.

13. Disposal considerations

Waste disposal of substance:
Do not discharge into drains/surface waters/groundwater. Dispose of in accordance with national, state and local regulations.

Container disposal:
Dispose of in accordance with national, state and local regulations. Recommend crushing, puncturing or other means to prevent unauthorized use of used containers.

14. Transport Information

Land transport
USDOT

Sea transport
IMDG

Air transport
IATA/ICAO

15. Regulatory Information

VOC content:
not determined Federal Regulations Registration status:
Chemical TSCA, US released / listed

EPCRA 311/312 (Hazard categories): Fire (Combustible Dust);

NFPA Hazard codes:
Health : 1 Fire: 2 Reactivity: 0 Special: HMIS III rating
