Handling:	Use appropriate personal protection equipment. Avoid eye, skin and clothing contact. Avoid breathing dust. Avoid repeated and prolonged contact. Avoid creating a dusting situation. Prevent buildup of static electricity. All equipment should be properly grounded.
------------------	--

Storage:	Store in a cool, dry, well-ventilated area away from incompatible materials. Keep container tightly closed. Store away from heat, sparks, and flame. Protect containers against damage. Keep material in supplier's packaging.
Other Precautions:	Avoid contact of material with open flames.

8. Exposure controls/Personal protection

Engineering Controls:	Adequate general ventilation is recommended when handling to control airborne levels.
Ventilation Requirements:	Use local exhaust to minimize dusting. Use mechanical ventilation for general area control.
Personal Protective Equipment:	Chemical safety glasses with side shields or chemical safety goggles
Eye/Face Protection:	
Skin Protection:	Gloves - PVC Do not wear textile or leather gloves. Clothing designed to minimize skin contact
Respiratory Protection:	Wear a NIOSH/MSHA approved dust respirator if dusting occurs, or there is potential for airborne exposures to exceed established threshold values. Consult the OSHA respiratory protection information located at 29CFR 1910.134 and the American National Standard Institute's Practices of Respiratory Protection Z88.2.
Other Protective Clothing or Equipment:	No information available
Exposure Guidelines:	See Section 2.
Work Hygienic Practices:	Wash thoroughly after handling. Wash contaminated clothing before reuse. Do not eat, drink, chew gum, use tobacco products, or apply cosmetics in work areas.
